Larry Johnson
Alton Coal Development
Alton, Utah 84710

Dear Mr. Johnson:

As per the request from the meeting I had with the DNR gentlemen on Wednesday, December 12, 2018, the following is the proposal for reclamation I was asked to submit to you for your consideration:

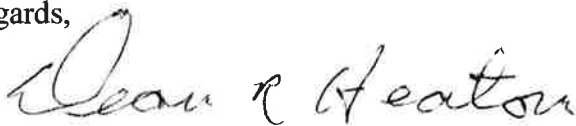

After the top soil is replaced on Parcel 9-6-12-2:

- Plant the west 10 acres in alfalfa with a cover crop of oats
- Plant the east 10 acres in wheat
- Place the water line and risers ^{flow} at the lane to the south of the property line. This will divide the east 10 acres and the west 10 acres
- We need to be able to harvest both crops the first year and every year afterward

The gentlemen at the DNR appeared to view this proposal favorably, and I hope that you will do the same.

Thank you for your consideration of this proposal.

Regards,

Dean R. Heaton
